

Catalog Umbrele si Parasolare 2023

50⁺
years

*Fifty years of
experience in parasols
and shade systems...*

There are those invaluable things... You can only understand their values when you do not have them... just like a parasol. Nobody remembers a wing to hide under before one gets soaking wet in the rain or a shade to take shelter against roasting sun. Right at the beginning of a long talk, the parasol we sit under disappears from our minds. We do not notice that we have a better taste of a wonderful food under a shade the best.

And there are those things... They help increase the comfort of our lives. Then, they become inevitable after they are noticed.

We wish you sunny days when you can enjoy the breeze under Parasols.

Usage Areas

Hotels / Restaurants

These are durable products for hotels and restaurants, and they present customization features specific to location and brand identity. Not only do they reflect the characteristics of businesses, they also make it possible for your guests to enjoy their comfortable times at outdoor living areas.

Gardens / Terraces

They present a comfortable outdoor experience in the gardens, terraces, or social areas of residences.

Poolside

They provide you with enjoyable shading area around the pools as perfect companions to sunbeds and sitting sets.

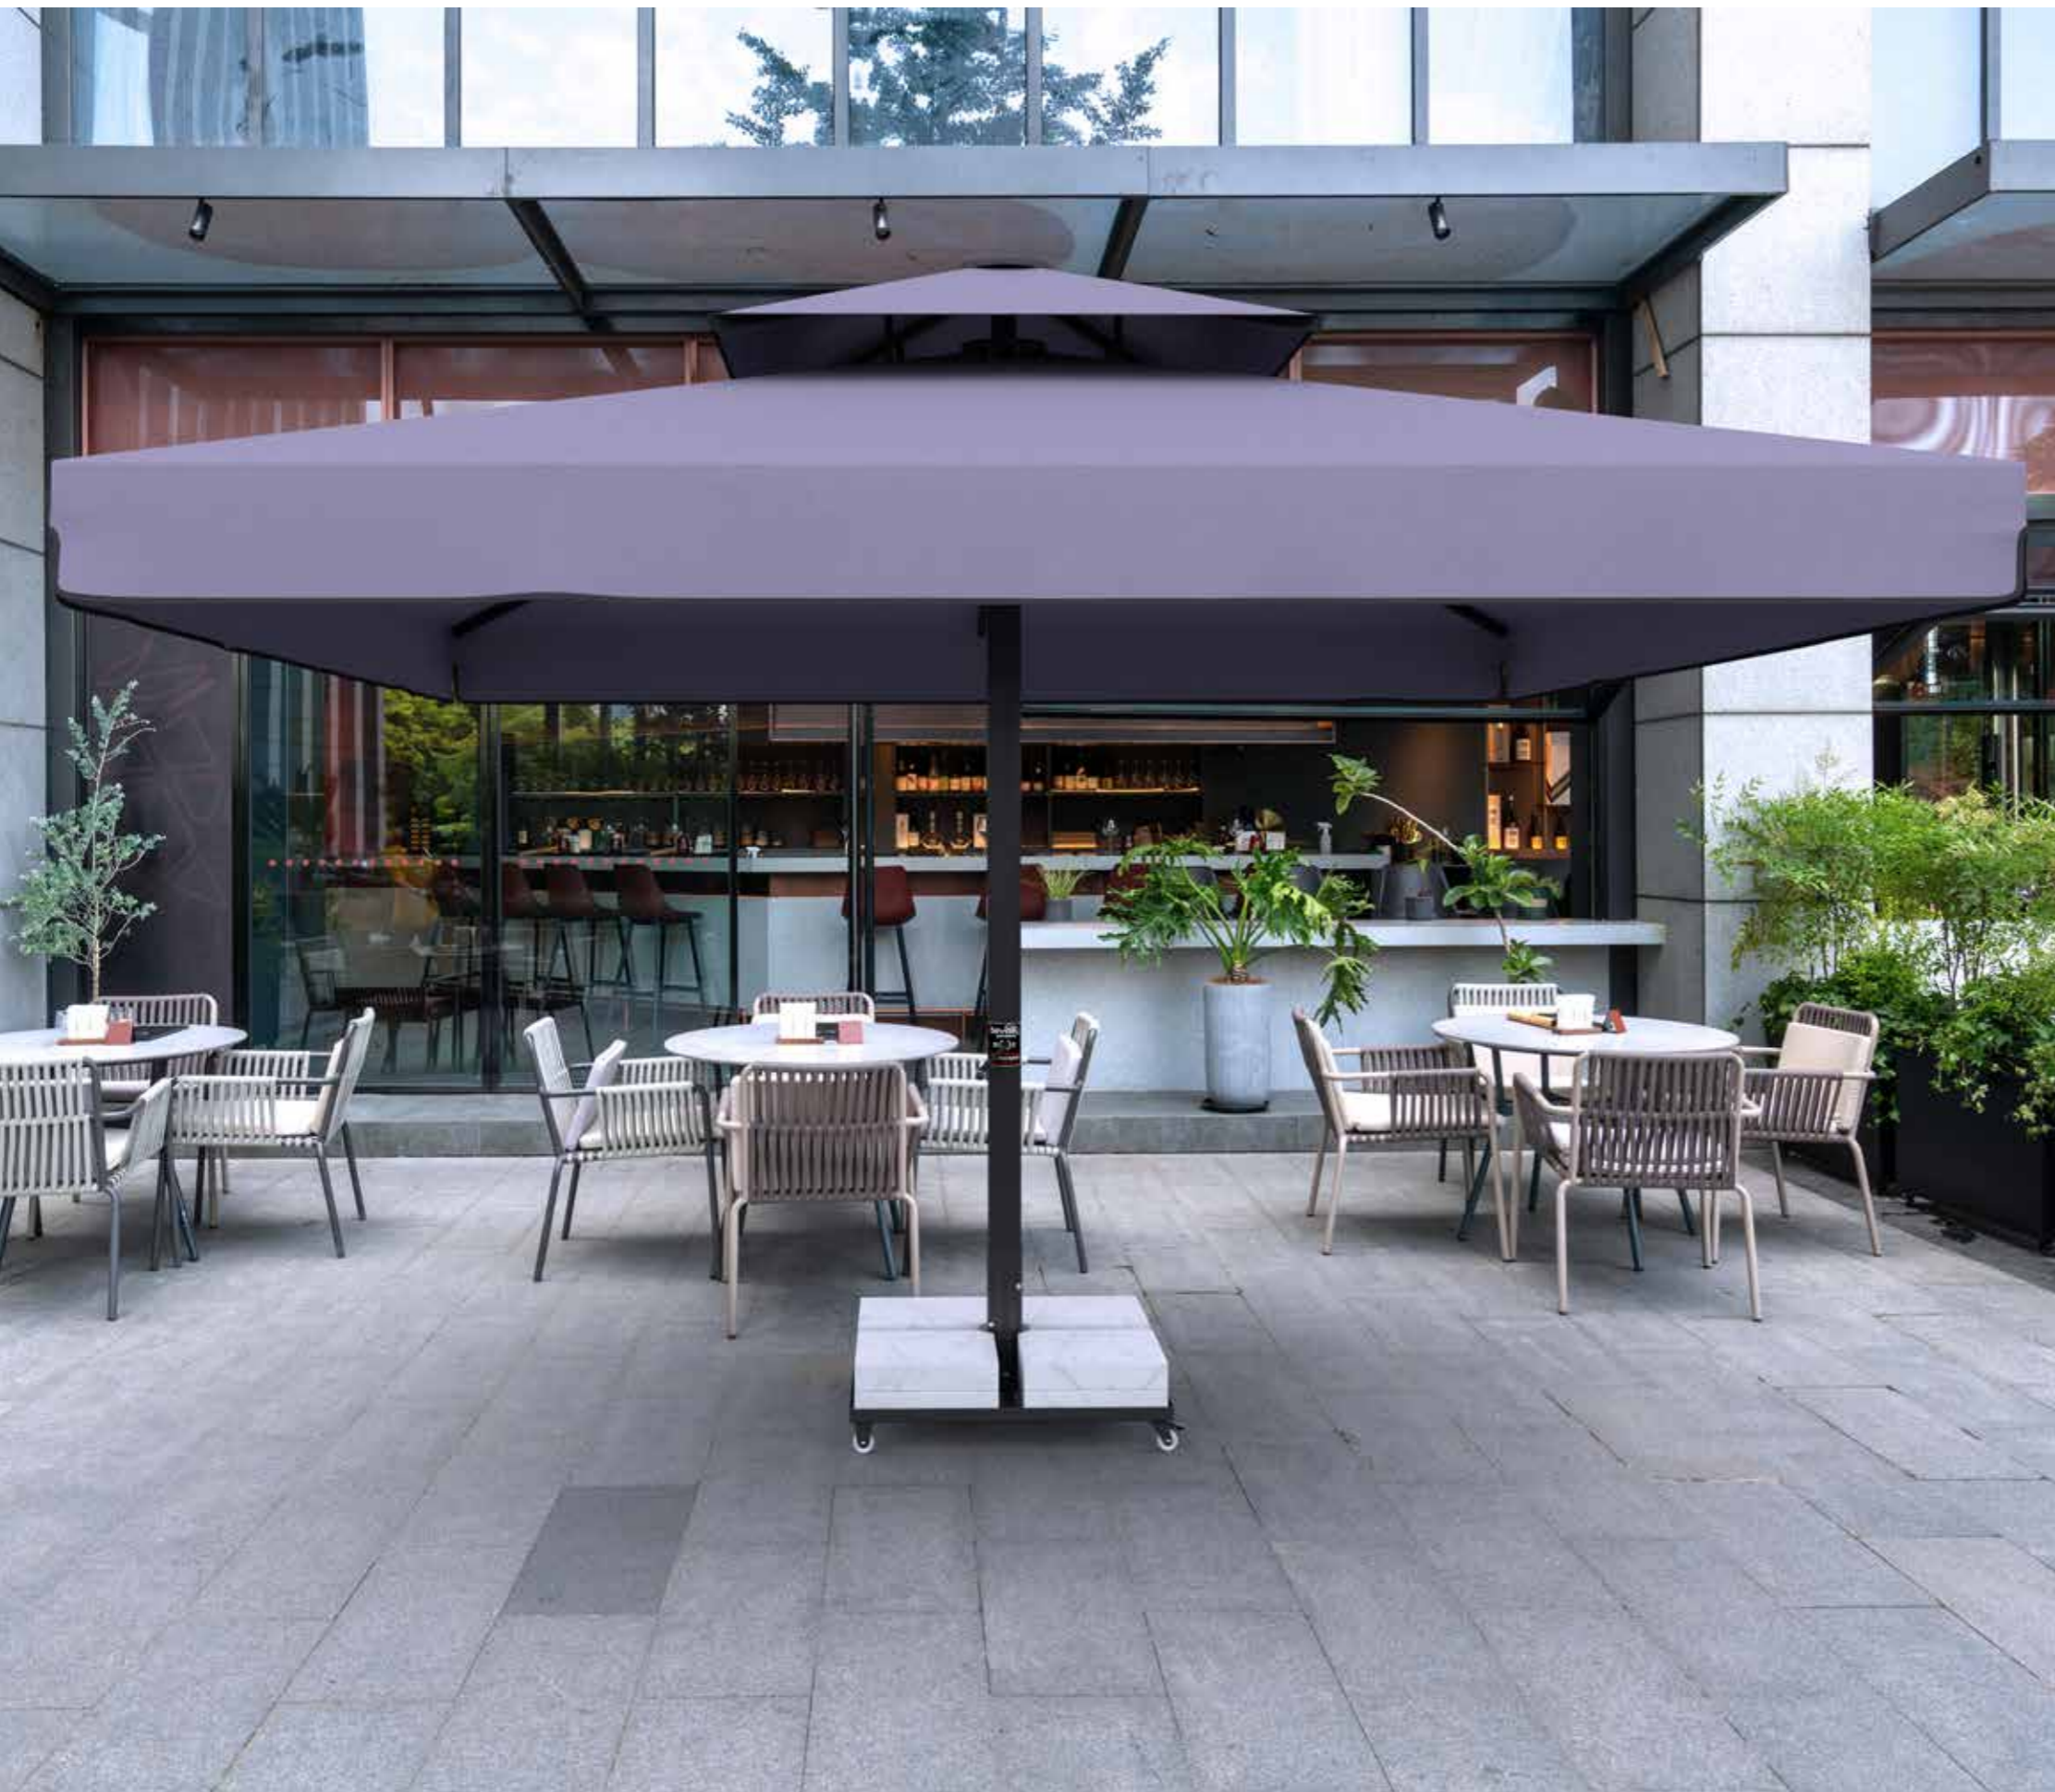

Balconies

They offer a protective and comfortable living areas at your balconies.

Beaches

They accompany your joyful moments on the beaches as perfect companions to sunbeds.

ATHLANTIC

PRODUCT

The Athlantic Parasol that offers the maximum protection area on single pole has a casting hardened aluminium frame. The moving telescopic system with crankshaft that is made of steel gives a seamless opening and closing experience. The water repellent fabric provides comfort under light rain and high-quality acrylic fabrics were used in the production against colour degrading. Thanks to the shaders, they offer great performance for protecting you against UV rays. Through the structure that resist harsh weather conditions and wind, they give you a long-term use.

The Athlantic Parasol furnishes your guests with a unified comfort area via your corporate identity thanks to its logo customization features for organizations like restaurants and hotels, frame and fabric customization features, complementary accessories, and technology packets.

TECHNOLOGY

By converting sunlight into energy via its solar panel, the Atlantic Parasol stores power in its integrated battery.

The remote control enables the controlling of the electric motor of the telescopic mechanism as well as the led lighting. To create a comfortable living area under the parasol in cold weather conditions, an energy infrastructure that can provide external power to the heaters use can be fitted.

All the energy related parts used on the parasol.

As far as the lighting is concerned, Osram 3000 Kelvin LEDs were used.

For Hotels and Restaurants

They offer maximum protection for outdoor living areas of hotels and restaurants. The durable and long-lasting structure help you and your guests have joyful moments under both sunny hot days and light rain conditions.

For Brands and Shops

It furnishes your guests with a unified comfort area via your corporate identity thanks to its logo customization features for organizations like restaurants and hotels, frame and fabric customization features, complementary accessories, and technology packets.

For Gardens and Outdoor Areas

On single pole, it offers maximum shading and a comfortable living area at your gardens and terraces. It provides you with an ideal comfort area so that you can enjoy nice weather outside.

Suitable for Profesional Users

It helps professional users and designers developing projects add comfort and joy to the locations they work on.

VICTOR

PRODUCT

Thanks to the pergolas system that works on vertical working principle between two poles, the Victor Parasol was designed in order to create a comfortable shade without any loss of space. The mechanism can easily be operated via the crank arm or the electric motor. The arms carrying the shading fabrics provides protection according to the position of the sun by taking a 30-degree angle back and forward.

For increased comfort under light rain, it is made of high-quality water repellent and fade resistant acrylic fabrics. The shader offers protection against UV rays. Thanks to the durable frame, it gives a longer lifespan against wind and other outdoor weather conditions.

TECHNOLOGY

The Victor Parasol stores energy in its integrated battery by converting sunlight into energy via its solar panels. The remote control commands both the electric motor of the telescopic mechanism and the LED lighting.

The energy components are produced and for lighting Osram 3000 Kelvin LEDs were used.

For Homes and Gardens

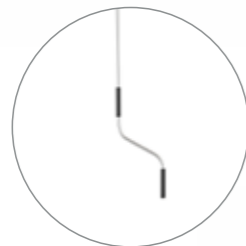

For your gardens and terraces, it offers maximum shade area on single pole as well as a relaxing living space under. On sunny days, it provides you with an ideal space to enjoy the outdoors.

For Hotels, Restaurants and Outdoor Users

At your outdoor spaces, you can welcome your guests with a shade comfort that will help them feel special. Moreover, it can easily fit into your design projects for such spaces.

Suitable for Architects and Projects

It is a functional product with various customization possibilities for designers who create stunning outdoor projects.

Integrated pulley mechanism

TECH PACKAGES

- Solar Panel + Led Lights
- Solar Panel + Remote Control Motor + Led Lights + Wind Sensor
- External Power + Led Lights

FRAME

Aluminum: EN-AW/6005 NORM - 85/90 HB HARDENED

ALBATHROS

PRODUCT

The Albathros Parasol was inspired by the wide wings of the Albatross birds. It adds independence and comfort to your spaces without any space loss by providing the maximum shade under the parasol through its durable cantilever frame.

Thanks to the unilateral System X mechanism, it offers an easy and a long-lasting use. The Albatros parasol, powered by a suspension to operate the large mechanism, presents users an easy opening with minimum effort. Thanks to the 360 degrees rotating base, you can create shade on different areas without changing the position of the parasol.

For increased comfort under light rain, it is made of high-quality water repellent and fade resistant acrylic fabrics. It offers protection against UV rays via the shade on the parasol. It proffers a long-lasting use due to its frame durable against winds and strong weather conditions.

For Hotels and Restaurants

They offer maximum protection for outdoor living areas of hotels and restaurants. The durable and long-lasting structure help you and your guests have joyful moments under both sunny hot days and light rain conditions.

For Brands and Shops

It furnishes your guests with a unified comfort area via your corporate identity thanks to its logo customization features for organizations like restaurants and hotels, frame and fabric customization features, complementary accessories, and technology packets.

For Gardens and Outdoor Areas

On single pole, it offers maximum shading and a comfortable living area at your gardens and terraces. It provides you with an ideal comfort area so that you can enjoy nice weather outside.

Suitable for Profesional Users

It helps professional users and designers developing projects add comfort and joy to the locations they work on.

Shock absorber support

Durable aluminum body and arms

LIFT SYSTEM

It possesses a unilateral X System feature. The hydraulic support helps slide system raise. Following the movement, the system locks the position.

RHODOS

PRODUCT

Thanks to its cantilever design, the Rhodos Parasol was produced to protect you from the sun and to add more comfort to your life without sacrificing shading space, especially around outdoor seating sets.

The Rhodos Parasol, which can be opened by cranking the fixed arm, can easily be tilted so that you can protect yourself at different times during the day. The 360-degree rotating base, it can also shift shading area to neighbouring areas seamlessly.

For increased comfort under light rain, it is made of high-quality water repellent and fade resistant polypropylene fabrics. It offers protection against UV rays via the shade on the parasol. It offers a long-lasting use due to its frame durable against winds and strong weather conditions.

For Homes and Gardens

For your gardens and terraces, it offers maximum shade area on single pole as well as a relaxing living space under. On sunny days, it provides you with an ideal space to enjoy the outdoors.

For Hotels, Restaurants and Outdoor Users

At your outdoor spaces, you can welcome your guests with a shade comfort that will help them feel special. Moreover, it can easily fit into your design projects for such spaces.

Suitable for Architects and Projects

It is a functional product with various customization possibilities for designers who create stunning outdoor projects.

How To Operate

You can open and close Rodos using the removable hand crank. When its fully open it can have tilt by loosening the locking lever.

Press the pedal that located on marble base to rotate 360°.

THROPIC

PRODUCT

With a plain and functional design, The Thropic Parasol was produced to create shades for sunbeds and small size seating sets.

The locking system made of aluminium not only gives strength but also an aesthetic view.

For increased comfort under light rain, it is made of high-quality water repellent and fade resistant polypropylene fabrics. It offers projection against UV rays via the shader on the parasol. It proffers a long-lasting use due to its frame durable against winds and strong weather conditions.

How To Operate

The parasol opens properly first by pushing the sliding mechanism up and then by locking into position on the lock mechanism.

For Hotels and Restaurants

They offer maximum protection for outdoor living areas of hotels and restaurants. The durable and long-lasting structure help you and your guests have joyful moments under both sunny hot days and light rain conditions.

For Brands and Shops

It furnishes your guests with a unified comfort area via your corporate identity thanks to its logo customization features for organizations like restaurants and hotels, frame and fabric customization features, complementary accessories, and technology packets.

For Gardens and Outdoor Areas

For Gardens and Outdoor Areas
On single pole, it offers maximum shading and a comfortable living area at your gardens and terraces. It provides you with an ideal comfort area so that you can enjoy nice weather outside.

For Poolsides and Sunlounger Sets

By the pools or on the beaches, it helps you create a shading space for two sunbeds.

PRODUCT

The long-lasting Pugley series have a pulley mechanism, and they were designed to create practical and comfortable shading for your spaces.

You can easily open your parasol after the integrated pulley is pulled and tied onto the hook on the frame.

For uninterrupted comfort under light rain, it is made of high-quality water repellent and fade resistant polyester fabrics. It offers a long-lasting use due to its frame durable against winds and strong weather conditions.

For Hotels and Restaurants

They offer maximum protection for outdoor living areas of hotels and restaurants. The durable and long-lasting structure help you and your guests have joyful moments under both sunny hot days and light rain conditions.

For Brands and Shops

It furnishes your guests with a unified comfort area via your corporate identity thanks to its logo customization features for organizations like restaurants and hotels, frame and fabric customization features, complementary accessories, and technology packets.

For Gardens and Outdoor Areas

On single pole, it offers maximum shading and a comfortable living area at your gardens and terraces. It provides you with an ideal comfort area so that you can enjoy nice weather outside.
